J. W. Bradley's New Patent Duplex Elliptic (or double) Spring Skirt.

The invention consists of Duplex (or two) Elliptic Pure Refired Sixel Springs, ingeniously braided tightly and firmly together, edge to edg , making he toughest, most inflexible, clastic, and durable Spring ever used. They seldom bend or break, like the single springs, and consequently preserve their perfect and beautiful shape more than twice as long as any single spring skirt that ever has or can be made.

made.

The wonderful flexibility and great comfort and pleasure to any lady wearing the Duplex Elliptic Skirt will be experienced particularly in all crowded assemblies, operas, carriages, railroad cars, church pews, arm chairs, for promenade and house dress, as the skirt can be folded when in use to occupy a small place as easily and conveniently as a silk or muslin dress.

A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Steel Spring Skirt for a single day will never afterwards dispense with their use. For children, Misses and young ladies they are superior to all others.

children, Misses and young ladius they are superior to all others.

The hoops are covered with two ply double twisted thread and will wear twice as long as the single yarn covering which is used on all Single Steel Hoop Skirts. The three bottom rods on every Skirt are also double steel, and twice or double covered to preve it the covering from wearing off the rods when dragžing down stairs, stone steps, etc., etc., which they are sometantly subject to when in use.

All are made of the new and elegant corded tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most durable, comfortable and economical skirt ever made.

MODEL SEWING MACHNE. Prominent among the mechanical triumphs of this most ingenious age, common honesty compels us to notice the Empire Sewing Machine, commended as justly styled perfection itself. Useful as have been the various sewing machines, from time to time presented to the public, each one of them has been cursed with some radical defect, which detracts from general utility. Warned by the experience of his predecessors, the inventor of the Empire Machine has produced an instrument, com-bining all the advantages for which others are vaunted, and obviating every defect which can be attributed to them by the most fastidious critic.

The Empire Macnine is a marvellous combination of simplicity, economy and perfect workmanship, being durable, free from li-bility to get out of order, noiseless, and ea-sy of operation. Its mechanical contin vance is such as to secure stability, free dom from accident, and accuracy as to workmanship. By the use of the patented shuttle and straight needle, it makes a stitch, which can neither rip nor ravelwhile, at the same time, it can operate perfectly upon every species of material from leather to cambric, with threads of cotton, linen or silk, from the finest to the

coarsest number. As the Empire Machine is gradually supplanting its more antique rivals, no one in want of a more useful iestrument of this description, be he or she tailor. coachmaker, dressmaker or seamstress, can do otherwise than secure of these economical and inimitable machines, suited alike for family and manufacturing purposes .-The office of the Empire Manufacturing Co. is at No. 536 Broadway, New York City, where they are now supplying these Empire Machines at prices far below thk real value of the instruments .-- New Yor
